

Beltone. Helping the world hear better

Beltone was founded on the act of helping a friend to enjoy life more. Since 1940, we have provided knowledge, tools, service and training to the professionals servicing the hearing impaired. Beltone makes quality hearing care available to more people. To do so, we develop technically optimal hearing solutions without ever losing focus on the individual's needs. It is our belief that no individual should be denied the possibility of an improved life with better hearing.

Beltone Boost is compatible with iPhone 5s, iPhone 5c, iPhone 5, iPad Air, iPad (4th generation), iPad mini with Retina display, iPad mini and iPod touch (5th generation) using iOS 7.X or later. Apple, the Apple logo, iPhone, iPad, iPod touch and FaceTime are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Dolby and the double-D symbol are registered trademarks of Dolby Laboratories.

Beltone Boost™

Powerful connections to everything that matters

Made for
iPod iPhone iPad

Powerful connections for better hearing

Living with a severe-to-profound hearing loss can sometimes be challenging. Beltone Boost is designed to help you face daily obstacles and lead the life you want. Specially designed for people with severe-to-profound hearing loss, Beltone Boost is one of the most powerful hearing aids on the market today. It's a robust and comfortable hearing aid that reconnects you to the sounds or conversations you might have been missing.

Thanks to the Made for iPhone® integration, you can wirelessly connect your super power hearing aids directly to an iPhone, iPad® and iPod touch®. No adaptor or intermediary devices needed. It's easy and discreet.

Beltone Boost doesn't compromise on sound quality either. Its advanced features like Feedback Eraser, Sound Shifter and CrossLink Directionality give you the combination of power and clear sound to keep you connected to life around you.

Powerful

connections to your
favorite devices

Beltone Boost's Made for iPhone integration opens up a world of new and exciting possibilities for people with severe-to-profound hearing loss. Now you can connect your iPhone, iPad and iPod touch to your hearing aids so you can stream sound wirelessly, without the need for an uncomfortable adaptor or streamer. Your hearing aids work like wireless headphones – talk on the phone, call through FaceTime®, or listen to music in stereo. It's a revolutionary way to help you hear sounds clearly and get an extra boost in life.

Control your hearing aids through the Beltone HearPlus app

It's never been easier or more discreet to control your hearing aids. Change volume, settings and programs, check battery status and even locate your hearing aids, if they happen to be lost, directly from your iPhone, iPad or iPod touch. It's as discreet as checking email or typing a text message. Use tips and tricks in the app's "My hearing aid" guide to get the most out of your hearing aids.

aids with the
HearPlus App

Great **power** and **reliability**

Maximum power and comfort

Beltone Boost isn't just a powerful hearing aid. It has a range of best-in-class sound processing features designed for severe-to-profound hearing loss so you experience a smooth, controlled sound without distraction or distortion.

Get clean, undistorted sound with **Feedback Eraser**, which removes all whistling and buzzing from feedback so you feel comfortable and confident all day long.

Hearing high-pitched sounds, like children's voices or birds singing, can be particularly challenging for people with severe-to-profound hearing loss. With the help of **Sound Shifter**, those hard-to-hear high frequency sounds are processed so you can enjoy a fuller sound spectrum with more details.

As a super power wearer, it's crucial that your hearing aids work at all times. Your Beltone Boost hearing aids are protected inside and out with **HPF⁸⁰ NanoBlock™**, a special coating that protects your hearing aid from water, moisture and perspiration. HPF⁸⁰ NanoBlock increases the lifetime of your hearing aids to give you years of worry-free wear.

Moisture, sweat and dirt simply roll off the hearing aid thanks to HPF⁸⁰ NanoBlock protection.

Powerful connections for all situations

Beltone Boost is designed for the most challenging listening situations, such as having a conversation in a noisy restaurant, talking on a phone or participating in a business meeting. Beltone Boost is packed with advanced technology to help you understand speech clearly and live every day to the full.

Differentiating between sounds in an environment with a lot of background noise can be a challenge. **CrossLink Directionality** constantly monitors your surrounding sounds and automatically adjusts settings, so you can focus on speech and catch that funny comment the first time, while paying attention to other important sounds that might be in the background.

Now you can rely on your hearing aids to automatically adjust volume and levels of background noise when your surroundings change. Smart features like **Smart Gain Pro** and **Sound Cleaner Pro** automatically reduce or remove unwanted noise and increase or decrease volume in your hearing aids. Now you can stay involved and concentrate on your conversation without any distractions.

Get more accurate settings for more comfortable listening with the help of **Ear to Ear Synchronization**. It automatically applies program and volume changes from one hearing aid to the other, so you don't have to change settings on both hearing aids.

Great design and accessories

Designed for you

Ergonomically designed for all-day comfort, Beltone Boost offers great power and more features than ever in a truly compact size. Beltone Boost is available in a variety of colors to match your style.

Beltone Boost has a full range of 2.4 GHz wireless accessories to help you stream sounds directly to your hearing aids, without an adaptor. It's a great advantage for people with severe-to-profound hearing loss, helping you focus on the audio source you want to hear.

Beltone Direct Phone Link 2

Chat on the phone hands-free and hear the conversation directly in your Beltone Boost hearing aids. Change programs and adjust volume with hearing aid remote control functions.

Beltone Direct TV Link 2

Stream high-quality stereo sound from the TV, stereo or PC straight to your hearing aids.

Beltone Direct Remote Control 2

Adjust volume in one or both hearing aids, change programs, or switch between streamed audio from a stereo system, TV or PC. It's easy to make adjustments on the large display using the simple controls.

Beltone Direct Personal Audio Link (myPAL)

Simply clip on a Beltone myPAL to the person you want to hear, and enjoy every word they say, directly in your hearing aids.
